The CW GPB Sealed Series Push Button switches are used in a wide range of applications for consumer electronics, appliance, telecommunications, lawn and garden, instrumentation, automotive, medical and more. These switches are used in both low voltage and high voltage applications that require high performance, repeatability, long electrical life and crisp actuation.

Our IP rated GPB Push Button Switches are sealed for protection against solid objects, materials, liquids or dust and solids rated up to IP 67. The switches are RoHS compliant and available in momentary and maintained versions in SPST and SPDT, with DP functions also available.

Termination options include PC mount. Solder and Quick Connect. Mountings are threaded collar or panel mount. The switch insulating materials are UL rated to 94 V2 and can be ordered in both illuminated and non illuminated versions and for many popular cut outs.
