US Tariffs Notification

Dear Customer Partners,

The United States government has announced tariffs on certain products and raw materials imported into the country that went into effect March 4, 2025. We continue to closely monitor this dynamic environment, with plans to implement tariffs based on the final rates, timing, and affected countries.

We have requested line-item details of products impacted by varying tariffs from all the manufacturers we distribute. As the US government's position evolves, the impact is likely to vary.

We are committed to serving you throughout this fluid situation. We will advise on a line-item basis the impact the US government imposed tariffs may have on your requirements. We will keep you informed of any changes. If you have any questions, please contact us at tariffs@peerlesselectronics.com.

Thank you for your continued partnership and understanding as we navigate these market challenges together.
